

# PlanPreschool

PlanPreschool toys combine learning with fun! Our carefully crafted push-pull toys, manipulative toys, musical instruments, games, puzzles and blocks are all specially designed to enrich your child's early development.

## Push-Along Duck

### PlanPreschool

Our carefully crafted push-pull toys are specially designed to encourage active play, movement, balance, and coordination. With the friendly feet flapping duck, children will have hours of fun pushing, walking, and watching the toy.

## Push-Along Elephant

### PlanPreschool

The Push-Along Elephant has blue floppy ears and a long trunk that moves up and down as preschoolers walk him around the house.

## PlanPreschool

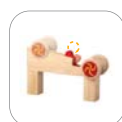

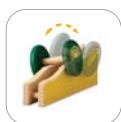

Plan BuildImagination is an expandable and compatible block building system that grows with your child. It begins with classic wooden blocks for basic building and stacking. It expands to add specialty blocks and construction elements for making more challenging structures; and then Plan BuildImagination advances to include parts for designing a marble run, bridges, tunnels, and entire kingdoms. Each themed set has the same scale so that all sets can be used interchangeably. Plan BuildImagination wooden block sets will provide many years of imaginative play, fun, and discovery.

## Plan BuildImagination Build N Spin

Build N Spin is designed to evolve with new challenges and rewards as children develop. The set encourages cooperative play as children work together to design and build race courses for the rolling wheels. Children will learn to understand cause and effect as they make adjustments to the design of the track. Special track sections such as the ramps and curves help develop visual tracking as children's eyes move to follow the roller along the course. The designs on the round ends of the rollers also create interesting visual effects as they spin. This set is ideal for group play. It gives children an opportunity to share their ideas and learn to take turns. Children can also add more fun and imaginative possibilities with other Plan BuildImagination sets.

## PlanLargeScale PlanActivity

Children can have fun maneuvering our new ride-ons designed to develop gross motor skills, coordination, and balance.

### Walking Elephant

The Walking Elephant moves forward with a rocking motion that feels like a real elephant! As children learn how to make the Walking Elephant move forward by rocking side to side, they will develop balance, gross motor skills, and coordination.

### Scooter

The five-wheeled Scooter is equipped with non-slip pedals, and a three-level adjustable handlebar. Children will enjoy riding this newly designed Scooter that helps develop gross motor skills, coordination, and balance.

### Racing Car

This classic ride-on car has a durable metal chassis, stylish wooden body, rubber tires, steering wheel, and sturdy passenger seat. The Racing Car comes equipped with non-slip pedals and safety brake. Children will develop gross motor skills and coordination as they practice steering, pedaling, and stopping.

Green Toy - Green Company

## PlanDollhouse Green Dollhouse

PlanToys® was founded with the goal of being a socially responsible company. Recognizing the need for preservation of our natural resources, we developed the Green Dollhouse to help children absorb some of the exciting new ways to use natural energy sources and have fun at the same time.

Green Dollhouse with Furniture

# PlanDollhouse

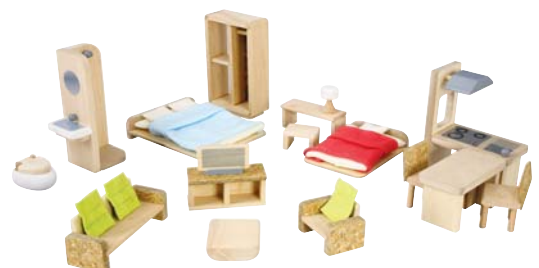

**The Green Dollhouse exposes children to future possibilities in the world of play.**

Sustainable living is an important concept that can be introduced at an early age. The Green Dollhouse exposes children to sustainable solutions in a fun playful environment so that they can become actively involved in the solution as we move forward toward a healthier future. The dollhouse's energy efficient design includes a wind turbine and a solar cell panel for generating electricity, a rain barrel for collecting rain, a biofaçade for summer shading, and a shade canopy for adjusting sunlight and air circulation. Recycling bins are included as well. Even the manufacture of the Green Dollhouse is green as recycled wood and E-Zero MDF are used for assembly. The colorful furniture set consists of a master bedroom, children's bedroom, living room, kitchen, and bathroom.

The Green Dollhouse is compatible with the entire PlanDollhouse line of dollhouses and accessories.

Eco Home

## PlanCity Eco Town

Our new Eco Town has been specially designed to help educate children about the importance of Eco living. Children will have great fun building their own Eco Town in creative ways. The Eco Town helps children develop logical thinking and planning skills, which are essential for intellectual development. Eco Town has been designed with eco-friendly transportation and buildings, so children can play with an entire town that runs on clean, renewable energy. The set consists of an Eco Home, Eco Train Station, Eco Charging Station, Eco Street Accessories, Eco Vehicles, and Eco Play Mat. Eco town is compatible with the entire line of PlanCity Road & Rail items.
